

# NSWRA Newsletter

New South Wales Rocketry Association Inc 19<sup>th</sup> April 2010

## Launch day: 27<sup>th</sup> March 2010

Conditions: Cloudy, calm

Quite a few launches took place on this day. Unfortunately, it was overcast on the day but conditions improved as the day progressed. George was getting some altitude with the water rocket – his personal best!

Photos of this day can be seen here:

## Launch day: 11<sup>th</sup> April 2010

Conditions: Fine but windy

I did not attend for the whole day. Slow to start off but the day progressed well considering the wind that picked up.

## High Power launches at Doonside.

As of this weekend (24/4/2010) we will be able to recommence level 1 certifications and the launching of H-powered rockets at Doonside. We have obtained approvals through Workcover and notifications are being issued to the fire brigade and the police. If you are interested in launching HPR please contact me.

## Next launch day

The next launch day is scheduled for Saturday 24<sup>th</sup> April 2010 followed by Sunday 9<sup>th</sup> May 2010. At this stage the weather forecasts predict fine weather.

## Remember: 2 launch days a month!!

Just a reminder that we now have two launch days a month – the last Saturday and the second Sunday of every month

Andrew Eltobaji  
NSWRA President
